

🎮 Command Guide – PC Version Colin McRae Rally 2.0

🎯 Basic Driving Controls

On PC, the default driving controls use the arrow keys: **Up** to accelerate, **Down** to brake or reverse, **Left** and **Right** to steer. The **handbrake** is assigned to the **Spacebar**, useful for tight turns. Press **C** to change the camera view (cockpit, hood, exterior) and **R** to look behind the car.

⚙️ Gearbox

Default setting: **automatic gearbox**.

If **manual gearbox** is enabled in options:

- **A** → Shift up
- **Z** → Shift down

Keys can be customized in:

Options → **Controls** → **Configure Keys**

🌀 Menu Navigation

- Arrow keys → Navigate
- **Enter** → Select / Confirm
- **Esc** → Cancel / Back

The same navigation logic applies throughout the game menus.

🎮 Compatible Peripherals

- Keyboard
- DirectInput controller
- Windows-compatible steering wheel

Configuration is done via:

Options → **Controls** → **Configure Keys**

🇨🇭 Recommended Keyboard Layout – Swiss French (QWERTZ)

For optimal comfort on a Swiss French (QWERTZ) keyboard, we recommend:

Key	Function
A	Accelerate
Y	Brake / Reverse
, (comma)	Turn left
. (period)	Turn right
Spacebar	Handbrake
C	Change camera view
R	Look behind

This layout groups all primary controls under the left hand for better vehicle control and faster response in corners.

Important Notes

- Keys listed correspond to the **default PC configuration** on a Swiss French keyboard.
- For other layouts (AZERTY, QWERTY, German QWERTZ), adjust keys in **Options** → **Controls**.
- You may add a **keyboard diagram** for your layout to make key positions clearer.
